

WHAT IS CLAIMED IS:

SUB
P1

1. An image pickup device comprising:

a connector that is connectible with an electronic apparatus; and

5 a reinforcing portion that is located near said connector and reinforces said connector when said electronic apparatus and said connector connect with each other.

10 2. An image pickup device according to claim 1 further comprising an anchor portion and a movable portion, said movable portion including an image pickup portion, and said connector and said reinforcing portion being placed on said anchor portion.

15 3. An image pickup device according to claim 2, wherein said reinforcing portion is stored in said anchor portion so that said reinforcing portion can project from said anchor portion.

20 4. An image pickup device according to claim 2 further comprising a stand that is connected with said anchor portion and serves to adjust a height of said anchor portion.

5. An image pickup device according to claim 4, wherein said stand also serves to adjust a tilt of said anchor portion.

25 6. An image pickup device according to claim 2, wherein said anchor portion includes a storage portion that can store said image pickup portion.

0094513-061600

7. An image pickup device comprising:

a connector that is connectible with an electronic apparatus; and
an attachment portion that enables said image pickup device to be
attached to an external apparatus.

5

8. An image pickup device according to claim 7, further comprising an

anchor portion and a movable portion, said movable portion including an image pickup
portion, said connector being placed on said anchor portion, and said attachment
portion enabling said anchor portion to be attached to the external apparatus.

10

9. An image pickup device according to claim 8, wherein said

attachment portion can be provided onto said anchor portion so that attachment portion
can project from said anchor portion.

15

10. An image pickup device according to claim 8, wherein said electronic

apparatus includes a display portion, and said attachment portion is attachable to said
display portion.

20

11. An image pickup device according to claim 1, wherein said connector

includes a USB interface.

12. An image pickup device according to claim 7, wherein said connector

includes a USB interface.
